

TAPROOT EARTH

Frontline communities from the Gulf South to the Global South are witnessing the worst of the climate crisis, including an increase in devastating storms, droughts, wildfires, heat, and land loss.

Taproot Earth is an **international climate justice organization** that was founded to create connections and power across issues, movements and geographies. We are **advancing solutions emerging from the frontlines** to tackle the biggest challenges of our time.

Our Core Solutions

Acknowledge and repair
the harms of extraction and
racialized capitalism.

Use facilitative
leadership to
build democracy,
power, and frontline
alignment.

Advance community
stewardship and
governance of
resources (water,
energy, land,
and finance).

To invest in the REEF Fund, please contact us at development@taproot.earth

Taproot Earth

Convenes, resources, and invests in the capacity and vision of frontline leaders; **Builds alignment and networks** of solidarity across borders from the Gulf South, Appalachia, and Black diaspora; **Reclaims culture and advances narratives** rooted in Black liberation, resistance, solutions, and love; **Establishes legal frameworks, policy standards, and models** of reparation and collective governance.

The REEF Fund

This is our invitation to **create your climate legacy**. Let's move capital with **Black Liberation** as our north star, to build a future where the frontlines are the **architects and beneficiaries**.

Taproot Earth's **REEF Fund is the solution** the philanthropic sector needs: the first funding vehicle for donors looking to put capital toward direct **climate repair and restorative solutions** for frontline communities.

The REEF Fund will work with global allies to move dollars to the ground in the **Global North and South through 2030** to address the impact of loss and damage and to escalate strategic interventions—like land reform and debt cancellation so funders can **maximize the impact** of their resources
